897200(AC110V) / 897396(DC97V)

■ Product overview

Function description:

This product is mainly used for the braking of Schindler escalators. It is the brake component on the traction machine and is installed on the top of the traction machine. It prevents the escalator from sliding due to external force when the escalator is stopped. It is used in emergency situations when the escalator is running, Emergency braking can be performed when the emergency stop button is pressed.

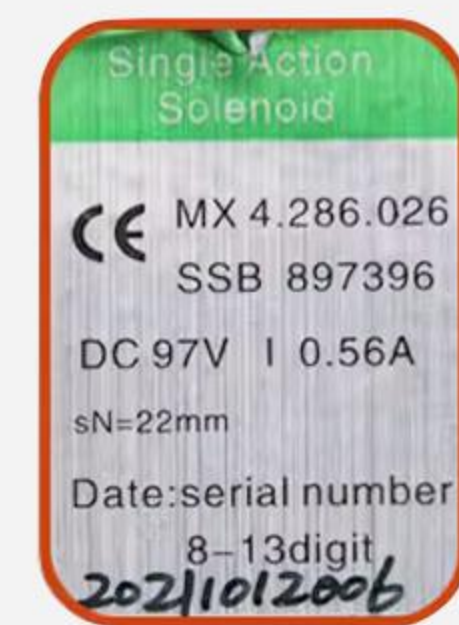

Scope of application: Schindler escalators 9300, 9500, 9700

02/Product Parameters

Basic Parameters

| Parameter | |
|--------------|--------------------------------|
| Product Name | Schindler Escalator Brake |
| Brand | Schindler |
| Model | 897200(AC110V) / 897396(DC97V) |
| Size | Width:10cm Length:29cm |
| Weight | 4.3KG |

Label

AC 110V

DC 97V

03/Supplementary Note

Note: If there is a rectified large capacitor in the escalator control cabinet, use DC 97V, if not, use AC 110V, usually 110V.

04/After-sales Service

Precautions: see in operation instructions

Warranty: 1 year

05/Package

Foam inner box

Corrugated outer box
